내멋대로ㅎLG?

Platform that enables users to add multiple home appliances into a routine and initiate those routines by a keyword triggered by voice recognition

Main Functions

Routine Customization

Users can add multiple home appliances to their routines and set operational details for each home appliance. They can set key words and reserve the operating time to initiate the routine.

Routine Recommendation

내멋대로ㅎLG will analyze data such as the age and size of household and recommend appropriate routines for users.

Trending Routine

Users can check out the most popular routine in real time.

Front-End

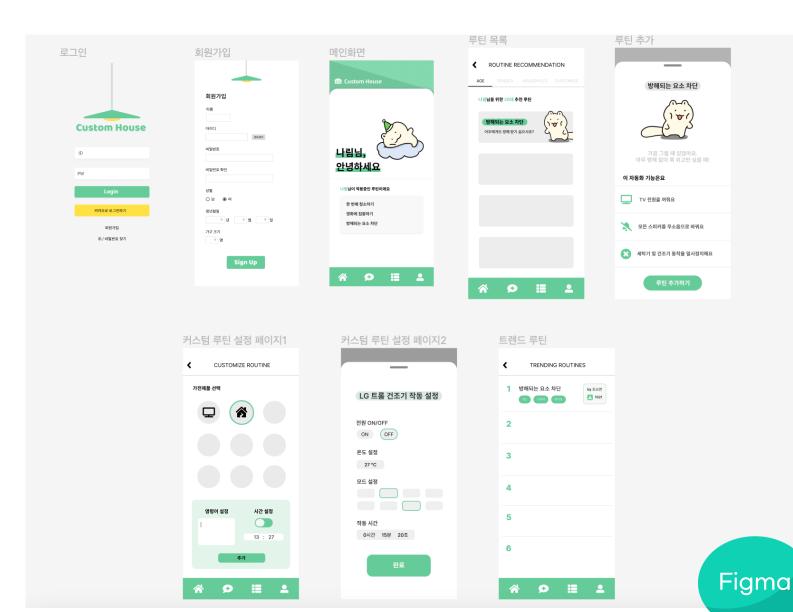

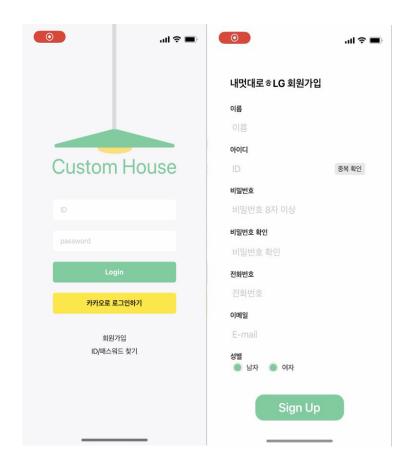

JavaScript framework used for mobile application for front-end development

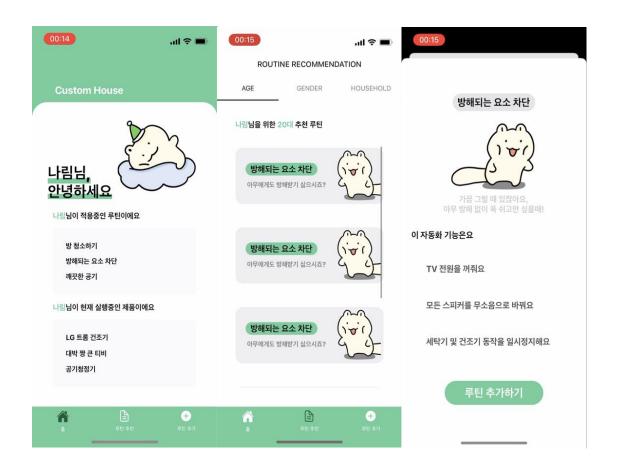

framework/platform for developing React Native applications

Front-End

Functions

U

Back-End

Java framework used for back-end development

document based NoSQL database system
